AHMED JAWAD

Front-End Developer | Vue.js · TypeScript · Tailwind CSS
+964 772 941 4599 • Baghdad, Iraq • ahmed.jawadk.work@gmail.com • GitHub: [ahmed-jawadk]

SUMMARY

Front-End Developer with a Batchlor's of Engendering in Information Technology, building production ERP interfaces with Vue 3, TypeScript and Tailwind CSS. Focused on reusable components, clean and maintainable code, and responsive, user-friendly business applications.

EDUCATION

Al-Nahrain University, Baghdad, Iraq Sep 2021 - Jun 2025

Bachelor of Engineering in Information Technology

- Relevant courses: Programming (C++, Python), Network Engineering

EXPERIENCE

Advanced Achievement - Front-End Developer, Full Time, Baghdad, Iraq Dec 2025 - Present

Project: Enjaz ERP

- Develop and maintain ERP modules and screens using Vue 3 and TypeScript
- Build reusable, strongly-typed UI components styled with Tailwind CSS, keeping the interface consistent across modules
- Implement data-heavy views: forms with validation, data tables, filters, and dashboards
- Integrate front-end views with back-end REST APIs and handle loading and error states
- Collaborate with back-end developers and the team through Git-based workflow and code reviews

Digital Zone - Marketing & Events, Part Time, Baghdad, Iraq Feb 2024 - Present

- Promoted services and events and managed event logistics

Freelance - Front-End Developer, Remote Sep 2026 - Present

Project: Royal Nuts - company website

- Built the Royal Nuts website from scratch using React, delivering a responsive, mobile-friendly experience
- Created reusable React components and pages to showcase the company's products and brand
- Worked directly with the client to turn requirements into a finished, deployed site

Toters - Order Management Agent, Full Time, Baghdad, Iraq Aug 2025 - Jan 2026

- Managed customer orders and resolved issues via chat and calls under time pressure

Baly - Driver Support Intern, Full Time, Baghdad, Iraq Aug 2024 - Oct 2024

- Resolved driver issues through the call center, ensuring smooth operations

PROJECTS & ACHIEVEMENTS

AI HUB 200 Hackathon - First Place Winner, Ebria Project, Baghdad, Iraq Aug 2023

- Built a route-finding web app that suggests the fastest route and estimates arrival time
- Tech: Python, JavaScript, HTML, CSS

CERTIFICATES & ACTIVITIES

Google IT Support Certificate Aug 2021

IBM course for Data Analysis - IBM Jun 2025

The Metro - Volunteer (events, content, design) Oct 2023 - Jun 2024

IYLEP Exchange Program, USA Jul 2019
